**URBANITY AND EVERYDAY LIFE. The development of inner cities and public space
- a shift of paradigm due to Corona?**

Conference: Thursday, 30th of June 2022. 6pm - 8 pm: Impulse lectures panel discussion

Organizer: dwb bw, Deutscher Werkbund Baden-Württemberg e.V.

Location: CHAPEL Room for Urban Culture Association, Rheinstraße 12/ 4, D - 69126 Heidelberg-Südstadt

Deficits in urban planning during the past decades have been named for years. Commercialization prevented lively inner cities after closing time. The municipalities' tight coffers and the associated sales of urban fillets to investors are fueling development and are creating dependencies.

With the global pandemic at the latest, something fundamental has to change. Massive restrictions and changed courses of action due to progressive digitization characterize public action and the design of everyday life in all areas of life.

You are invited to discuss suggestions with us and to develop possible solutions for ways out of the crisis in inner cities and public spaces

6 pm Greeting:

Alexander Grünenwald, 1st Chairman dwb bw
